

# Center for Bio-Ethical Reform

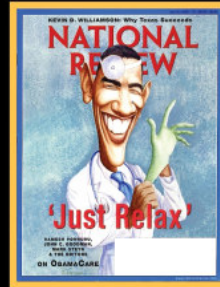

Dear Pro-Life Friend,

November 2009

**I AM NOT EXAGGERATING. IF PASSED, OBAMACARE WILL CODIFY ABORTION ON DEMAND!**

President Obama is in the process of ramming federal funding for abortion down our throats. If he is successful, abortion could be put out of reach for at least a generation. Believe me, the stakes are that high. Sadly, few Americans are aware of these details. That is on purpose. When asked about abortion and health care reform, the *LA Times* quoted Obama as saying "I think it is appropriate for us to figure out how to just deliver on the cost savings and not get distracted by the abortion debate." Distracted by abortion? Obama wants to change the subject. Our "transparent" president wants no one to read the bills which mandate abortion coverage for every woman in America, paid for with every American's tax dollars and every American's insurance premiums.

"[Regarding health care reform] ... we judge that the president goes too far when he calls the statements that government would be funding abortions 'fabrications.'" FactCheck.org, The Annenberg Public Policy Center, August 21, 2009

**Our NEW signs will hold Obama accountable for his radical pro-abortion agenda.**

President Obama has intentionally misled the American people. When he addressed a joint session of Congress recently, he said that the health care reform bills would not fund abortions; but when he talked to Planned Parenthood in 2007, he defined abortion as "essential care." Which is it? According to the Associated Press, (*Government insurance would allow coverage for abortion, August 5, 2009*) "since abortion is a legal procedure, experts on both sides say that not mentioning it would allow health care plans in the new insurance exchange to provide unrestricted coverage." Unrestricted coverage means more dead babies, more maimed mothers, and more hurting fathers. Despite the U.S. House recently passing a health care measure, House Speaker Nancy Pelosi has reportedly promised pro-aborts that the pro-life restrictions inserted to pass the bill would be stripped out of the bill before final passage. CBR sees the threat posed to preborn babies and their parents by health care reform and is dropping everything we are doing to fight back. Can you drop what you are doing to help us?

**OBAMACARE'S FUNDING OF ABORTION WILL CHANGE AMERICA FOREVER! PLEASE JOIN CBR IN FIGHTING THIS BATTLE. IT IS NOT TOO LATE TO BEAT BACK THIS OBAMANATION!**

At the University Of Notre Dame in May, 2009, CBR launched the campaign to expose Obama's radical pro-abortion position to America. By God's grace we helped to make abortion a national story. But that was then—this is now. With ObamaCare, preborn babies face an even greater peril. According to the Pew Research Center, 6 out of 10 Americans don't even know Obama's position on abortion. To defeat ObamaCare, that needs to change. CBR is willing and able to change it.

CBR is unveiling dozens of new GAP signs to educate the American public, university students, and the Congress on the deadly aspects of ObamaCare. Several hard-hitting new signs are coming online NOW. Lord willing, and with your help, we will be ready to fight back immediately. Enclosed you will find a sampling of CBR's new Obama Awareness Signs. By supporting us, these signs will become a new addition to CBR's campus outreach—the Genocide Awareness Project (GAP). Because college age youth virtually worship President Obama, combining some Obama signs with the traditional GAP signs will create even more controversy, helping us to educate more students on the abortion issue and derail abortion funding in ObamaCare. CBR's message is "Abortion is not health care!"

**Pro-Life Institute equips students.**

**OUR GAP DISPLAY IS 11 YEARS OLD. CBR NEEDS TO UPGRADE OUR GENOCIDE AWARENESS PROJECT, PURCHASE NEW SIGNS, AND MAKE OTHER NEEDED IMPROVEMENTS. YOUR GIFT OF \$1,100 WILL BUY FOUR NEW 6' X 12' GAP SIGNS.**

You can get involved by cutting out the enclosed signs, sending them to your senator and representative in Washington, DC, and asking them not to fund abortion in ObamaCare. Give these pictures to your family, friends, and colleagues who support Obama and abortion. Email an electronic version of the signs ([www.cbrmidwest.org/pdf/Obama\\_signs.pdf](http://www.cbrmidwest.org/pdf/Obama_signs.pdf)) to others on your email list. Whether the signs deliver the message on campus, through the mail, or over the Internet, together we can make a difference!

On October, 25-27, 2009, CBR conducted GAP and the Pro-Life Institute (PLI) at the University of California at Berkeley. The response from both friend and foe was off the charts. Read this from the pro-abortion blog [www.worldcantwait.org](http://www.worldcantwait.org):

**URGENT ALERT! DEFEND WOMEN, DEFEND CHOICE! RIGHT WINGERS ASSAULT BOTH IN BERKELEY!**

*Seemingly out of nowhere, a horribly ugly assault on women and reproductive rights is happening right now at UC Berkeley. A Christian fundamentalist and Christian fascist road show calling itself the Center for Bio-Ethical Reform arrived at Sproul Plaza early this morning to stage what it calls its "Genocide Awareness Project" (GAP).*

*The World Can't Wait movement is sounding the alarm: tell everyone you know—women and men, students and older people, too—get down to Sproul Plaza and make your presence count.*

And come they did! For nearly three hours abortion advocates led by a professor from the Gender Studies Department and the local NOW chapter attempted to surround our exhibit while chanting "My body, my choice!" Despite their attempts to interfere with our "elaborate HUGE display of bloody fetus pictures ..." we changed students' hearts at UC Berkeley.

**OUR WINTER GAP TOUR WILL GO TO FOUR LARGE FLORIDA UNIVERSITIES. THIS TOUR WILL COST CBR \$30,000. YOUR GIFT OF \$550 PAYS FOR TRUCK AND CAR FUEL FOR ONE FULL WEEK.**

**Our signs vs. their signs**

In February, 2010, CBR will travel to Florida to display GAP at four universities: the University of Florida, the University of Central Florida, the University of South Florida, and Florida Gulf Coast University. At least 120,000 students and faculty are waiting for us to tell and show them the truth. In addition, our international affiliates from Europe and Canada will be joining us in Florida to be trained by our Pro-Life Institute and then be taken on campus to participate in GAP. CBR is training the next generation of leaders! We are literally reaching the world. We are equipping these brave men and women from all over to return home with new and effective pro-life tools. Abortion isn't simply an American problem. It is a global problem and CBR is fighting abortion worldwide.

We can't restart the abortion wars and get back on the road to victory without a debate and there will be no debate unless we force it on people who are profoundly defensive about the issue. Abortion pictures are the only effective way of forcing that debate and ensuring that the resulting discussion is well informed. We have to settle the facts before we move to the arguments. Who is the baby? What does abortion do to him/her? If viewers get nothing else from our signs, they will understand who the baby is and they will understand abortion. They will see what matters most.

**PLEASE SEND US A SPECIAL YEAR END GIFT. WE ARE TAKING ON NEW STAFF FOR THESE NEW INITIATIVES. YOUR GIFT OF \$250, \$100, \$50, OR \$25 HELPS TO PAY INTERN SALARIES AND WILL BRING OUR INTERNATIONAL ACTIVISTS TO FLORIDA FOR GAP TRAINING.**

Most Americans believe that a preborn child, especially in the first trimester when the vast majority of abortions occur, is not developmentally entitled to rights of personhood. The culture of death has done a very effective job of persuading the public that the baby is just a blob of tissue until late in pregnancy. The rights of mothers will always trump the rights of blobs in the public mind unless we show them the facts. Most Americans do not believe that abortion is an evil of sufficient enormity to justify criminalizing the act. Americans venerate the concept of individual liberty, made manifest in personal choice. When we allow the other side to frame the issue as a debate about the right to choose, we have lost even before the first arguments are exchanged. But when we force the public to look at what is being chosen, we have won as soon as the first pictures are shown.

Soon, CBR will head to Washington, DC, with our upgraded and improved Genocide Awareness Project (GAP). We are pulling out all the stops. President Obama and Congress will be confronted with the evidence that killing babies is not health care reform! These new signs are a game changer! Please help us get these images into the heads of Americans.

Warmly In Christ,

Mark Harrington, Center for Bio Ethical Reform

PS. I just received this email from a 21-year-old female from California, "After seeing these pictures, I cannot go through with it [abortion]." Your continued prayers and support are saving lives—one person at a time.
